

## New Piler design for smaller storages and cellars

# NEW PILER

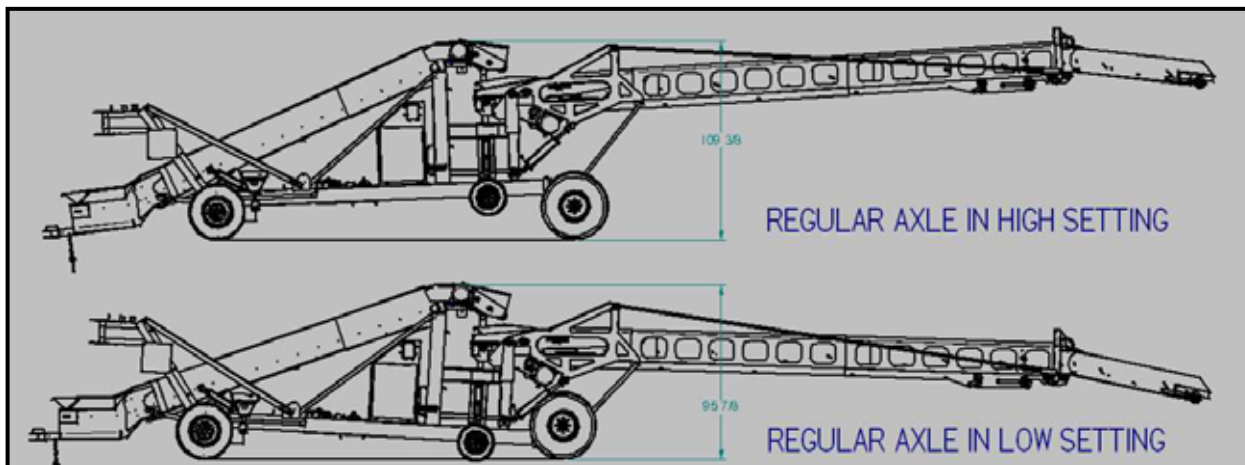

### New System

- New design of continuous belt boom
- Flexible operation with bolt on axle (high and low position) for trailer loading or driving into cellars with height under 8 feet
- Auto speed system is optionally available
- The drop from the elevator onto the boom is the lowest in the industry giving this piler the best bruise free ratings
- Boom length allows loading of 53' trailers
- The electrical drive is a proven, simple and reliable system
- Optional crab steering provides superior maneuverability inside the storage
- Most operator friendly and reliable remote control in the industry
- **Now available with Fill assist**
  - Automatic boom swing (right / left / up / down)
  - Adjustable constant drop
  - Swing pause when no product on the piler
  - Stores your product bruise free without dirt nests in the pile
  - Saves up to one person in the cellar
  - Easy to adjust
